- ✚ StandardHours and EmployeeCount columns are not varying.
- ✚ It's ambiguous if the PercentSalaryHike is for the last year or the whole working year.
- ✚ Performance rating is one of 3 and 4, which is an overly optimistic measurement and not likely to improve model performance as it would've made if it's adequately measured.
- ✚ There are empty cells in "NumCompaniesWorked", "TotalWorkingYears", "EnvironmentSatisfaction", "JobSatisfaction", and "WorkLifeBalance".
